# MedsOnCue

By VUCAHEALTH

## ENHANCED PATIENT SAFETY AND PHARMACY EFFICIENCY

Medication confusion and misuse can occur even with the most well intentioned patient. When it does there is the potential to negatively impact the patient, their family and even the pharmacy operation. It's a costly problem experienced across the nation. But now, we have the cure.

MedsOnCue by VUCA Health offers an easy-to-use mobile technology solution that can help pharmacies deliver enhanced levels of operational efficiency, medication safety, and patient education.

### + PHARMACY-SPECIFIC BRANDING

The entire MedsOnCue program is branded to your individual pharmacy. Promoting your name and logo provides continuity for your patients and encourages greater acceptance of the information shared by the MedsOnCue service.

### + ON-DEMAND VIDEO LIBRARY

With well over 2,000 videos our medication video library is the largest in the world; with comprehensive information on the drugs you prescribe the most. Your patients can watch the MedsOnCue videos (in English or Spanish) for answers to their questions about side effects and appropriate use, and will always be one click away from connecting to your pharmacy should they have any additional concerns.

### + IN-HOME PHARMACY SUPPORT

Not only will your patients and their caregivers have the resources they need to answer their medication questions on their own, the MedsOnCue service can send important reminders. Patients can schedule daily medication and refill alerts based on their needs.

### + QR CODE TECHNOLOGY

MedsOnCue enables pharmacies to put medication-specific QR codes on all of their prescription labels. Patients and their caregivers scan these codes and immediately gain access to the MedsOnCue video library of drug information. Thus, eliminating the need to print pages of medication documentation that typically go unread. In addition, the patient has ready access to a host of empowering features such as specific pill images, access to FDA Med Guides, and information related to pertinent medical conditions.

### + TECHNOLOGICAL LEADERSHIP AND MORE

Pharmacies that utilize MedsOnCue find that patients of all ages are impressed with the new innovation and enhanced focus on safety and education. It's another reassurance that your pharmacy will always be the best choice for your patients' needs.
