# Helix Pharmacy System™

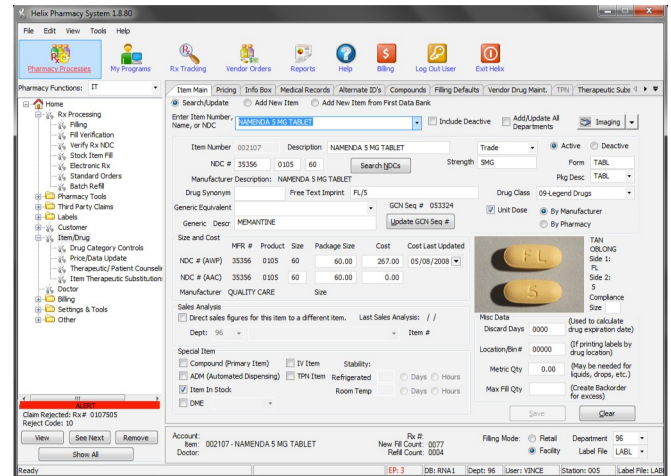

## A Complete Pharmacy Solution

The Helix Pharmacy System is ideal for any closed door institutional, pharmacy, Retail-LTC pharmacy, or any hospital pharmacy that services long term care patients either directly or in the community.

### Integration into Your Pharmacy Operations

Helix easily integrates into your pharmacy operations. It has many interfaces for automated packaging machines, electronic medical administration records (eMAR) and facility software systems, wholesalers, consulting software, high volume mail order packaging, IVR, POS, claim reconciliation services, and remote dispensing solutions. Helix utilizes integration technologies as well as widely accepted messaging formats such as HL7 & NCPDP 10.6.

Helix Electronic Prescribing is compliant with the NCPDP D.0 standard and is certified with Surescripts®. Helix also provides direct e-Prescribing solutions between the facility and pharmacy.

Helix is fast, easy to use, and it is easy to train your staff with its intuitive design and logical content layout.

## Helix Features

- **Billing** -- Fully integrated accounts receivable module for posting AR in real-time, third party claim rejection tools, and streamlined facility and private billing options.
- **Processing** -- Efficient prescription processing, complete cycle filling options, IV and Compounding with worksheets, multi SIGs, 24 hour pass-times, and user defined menu options.
- **Reporting** -- Integrated reporting module with full reporting capabilities with virtually unlimited reports.
- **Inventory** -- Perpetual inventory control and EDI purchase ordering with many wholesalers. Custom inventory tracking methods. Utilize the inventory apps with barcode scanning for inventory counting and incoming orders.
- **Medical Records** -- Complete medical forms with laser printing for MARs, flow sheets, treatment records, and physician orders. Have complete access without having to pay for as-you go printing.
- **Retail** -- Enhanced retail workflow, easy patient prescription transfers to and from other pharmacies.

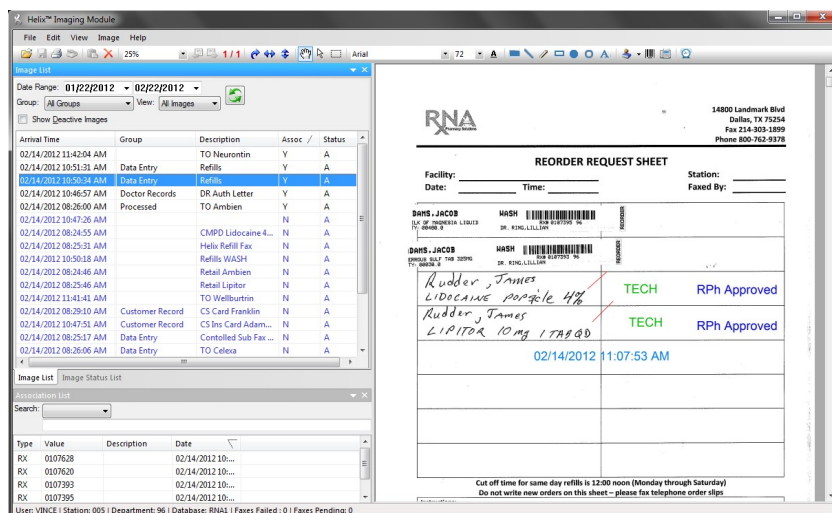

# Pharmacy Solutions

## Helix Imaging™

### A Pharmacy Document Management Solution

Helix Imaging is a digital document management solution with a fax-server and scanner that is highly integrated with the Helix Pharmacy System to help reduce pharmacy paper handling and increase workflow productivity. Quickly associate images during order processing and easily retrieve documents for audits.

### Key Benefits

Increase productivity by reducing the time needed to manually handle and route paper documents. Reduce paper and related material costs. Greatly increase staff communications and support correct processing by having the associated image display with the order.

- » Electronic storage and retrieval of documents
- » Automatic routing of incoming faxes to specific workflow groups
- » Electronic interpretation of refill bar codes for batch filling
- » User defined workflow groups
- » Automatic display of associated image during pharmacist's fill and product verifications
- » Complete Image histories
- » Quickly find documents for audit
- » Automatic Image association during prescription order entry for greater accuracy
