

Long Term Care Facility Apps

iAMOS Rx™

Automated Medication Ordering System

An entirely new mobile solution for processing orders directly from the facility to your pharmacy.

The Best experience for the Nurse

iAMOS Rx is a mobile facility-to-pharmacy app designed to maximize the nurse's experience and acceptance of electronic ordering technology.

iAMOS Rx Features

- View Resident's Current and Historical Medication Profile
- Request New, Refill, & Discontinue Orders
- Clinical Information - potential side effects, indications for use, contraindications.
- Review Filling Status of Transmitted Orders
- Produce Clinical Reports
- Review & Print Facility Billing Reports
- MDS 3.0 Drug Therapy
- Print Medication Administration and Physician Order Forms

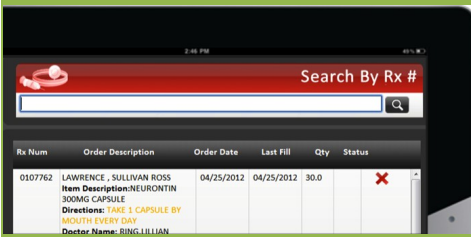

iAMOS Rx utilizes the multi-touch interface of the iPad® to make scrolling through the Resident data an entirely new experience and more dramatically interactive than a desktop computer. Control everything using only touch—whether you're entering new orders, selecting refill orders or looking up clinical information. Increase productivity by reducing the need to fax or telephone orders to the pharmacy.

As a mobile app, iAMOS Rx is the perfect companion permitting the nurse immediate access to the Resident profile and medication ordering at the medication cart or anywhere in the facility.

Connectivity

There are two options with the iPad: support for Wi-Fi 802.11 a/b/g/n wireless networks and cellular connectivity will ensure maximum up-time at the facility. iAMOS Rx can be accessed via a web browser.

Long Term Care Facility Apps

Fast Refills

Quickly refill orders directly from the patient's profile or scan many orders with a barcode scanner and web browser. Patient profiles show full drug descriptions to help assure proper ordering and allow you to view remaining refills.

iAMOS Rx On-Demand Reports

With iAMOS Rx, the facility can generate their own clinical and end-of-month billing reports at any time. This saves time by printing the information at any time and with selected report data elements.

Clinical Reports

Allergy, Antibiotic, Antidepressant, Antipsychotics, Diabetic Medication, Diet, Insulin, Psychoactive, Antianxiety and Anticoagulants.

Cost Containment Reports

iAMOS Rx utilizes the facility's formulary to help monitor drug costs. Report Types: Prescriber Formulary and Non-Compliance, PDP not Covered, Overall Formulary Usage, and Drug Utilization.

Billing Reports

Once the pharmacy's end-of-month billing cycle is completed, the facilities can print their own Billing Summary and Facility Invoices to plain paper.

Medical Forms

Print medical administration and physician order forms at any time especially upon a new resident admissions.
